

<b>Fusion Middleware Product</b>	<b>TLA</b>	<b>Description</b>	<b>Comments</b>
<b>Access Manager</b>	OAM	Offers single-sign on, access policy creation and enforcement, self-service, delegated administration, password management, reporting and auditing.	Identity Management Suite, Single-Sign On Suite
<b>Application Development Framework</b>	ADF	Java framework tools for visual development.	
<b>Application Server</b>	OAS	Backbone of the Fusion Middleware. J2EE 1.4 support, Web Services Support, Enhanced Messaging, Transaction Management, Security Features, Clustering, Grid Computing, and Monitoring & Management.	Available in Enterprise, Standard Edition, Standard Edition One and Java versions.
<b>Application Server Containers for J2EE</b>	OC4J	Java environment with support for UDDI, SOAP and WSDL.	
<b>Application Server Map Viewer</b>		Java map viewer using spatial data.	
<b>Application Server Web Cache</b>		Built-in web caching for performance improvement.	
<b>Application Server Wireless</b>		Connects wireless devices to applications and databases via internet.	
<b>BI Answers</b>		Provides ad-hoc query and analytics for business users.	Business Intelligence
<b>BI Delivers</b>		Near real-time alert engine for initiating workflows and notifications.	Business Intelligence
<b>BI Discoverer</b>	DISCO	Ad-hoc query, reporting, analysis and web publishing tools.	
<b>BI Interactive Dashboards</b>		Thin-client solution for analytics.	Business Intelligence
<b>BI Publisher</b>		Reporting component for templates, reports and documents. Formerly XML Publisher.	Business Intelligence
<b>BI Server</b>	OBIEE	Business Intelligence Server.	Comes in Enterprise Edition Plus, Standard Edition One, Standard Edition and Hyperion Essbase.

<b>BPEL Process Manager</b>	BPM	Orchestrates, executes, monitors and optimizes web Services. Designer, Console and Server included. Supports Human Workflow.	SOA Suite
<b>Business Activity Monitor</b>	BAM	Monitor and manage with real-time alerts and business dashboards. Includes Web Browser Dashboard, Business User Authoring and Real-Time Analytics	SOA Suite, EDA Suite
<b>Business Process Architect</b>	BPA	Enables modeling business processes using multiple methods and notations in a GUI interface. From ARIS.	BPA Suite
<b>Business Process Simulator</b>		Simulates the modeled processes to develop what-if scenarios to arrive at an optimal process model. From Aris.	BPA Suite
<b>Business Process Publisher</b>		Publishes the process models to a portal for review and feedback by the business user.	BPA Suite
<b>Business Process Server</b>		Enables collaborative development of process models with a shared repository.	BPA Suite
<b>Business Rules</b>	OBR	Infrastructure for implementing and refining business rules and policies. Includes authoring tool, engine and SDK.	SOA Suite, EDA Suite
<b>Coherence</b>		Scales mission-critical applications by providing fast and reliable access to frequently used data in distributed memory.	
<b>Connection Server</b>		Automated distribution, transformation and management via the Internet.	Content Management Suite
<b>Content Categorizer</b>		Provides taxonomies for content.	Content Management Suite
<b>Content Converters (PDF, XML, TIFF)</b>		Converts content to multiple formats.	Content Management Suite
<b>Content Management</b>		Digital asset, information rights, records management functionality.	

<b>Content Portal Suite</b>		Portlets for Weblogic, WebSphere, Sun One and Plumtree.	Content Management Suite
<b>Content Publisher</b>		Publishes content in over 225 file formats as HTML, XML, cHTML, or WML format.	Content Management Suite
<b>Content Server</b>		Web-based repository for content life-cycle management.	Content Management Suite
<b>Content Services</b>		File and content management component.	Collaboration Suite
<b>Content Tracker</b>		Provides metrics for usage and access of content.	Content Management Suite
<b>Data Integrator</b>	ODI	Batch data ETL functionality that works with SOA and MDM.	
<b>Disconnected Analytics</b>		Full analytic functionality for the mobile professional.	Business Intelligence
<b>Enterprise Manager</b>	OEM	Browser-based management and monitoring tool.	
<b>Enterprise Service Bus</b>	ESB	Framework for integrating data and enterprise applications internally and with partners. Multi-protocol and can transform, filter and route data.	SOA Suite, EDA Suite
<b>Forms</b>		Legacy PL/SQL-based development environment.	
<b>Hyperion Financial Reporting</b>		Creates book-quality financial reports.	Business Intelligence
<b>Hyperion Interactive Reporting</b>		Creates charts, pivot tables and reports from operational or analytic sources.	Business Intelligence
<b>Hyperion SQR Production Reporting</b>		Provides cross-functional reporting from multiple database vendors.	Business Intelligence
<b>Hyperion Web Analysis</b>		OLAP analysis, presentation and reporting tool.	Business Intelligence
<b>Identity Federation</b>		Multi-protocol federation server.	Identity and Access Management Suite, Single-Sign On Suite
<b>Identity Manager</b>	IdM	Flexible and scalable system to centrally control user accounts and access privileges.	Identity and Access Management Suite, Single-Sign On Suite
<b>Image, Video and Basket Managers</b>		Enables search, grouping and downloading of media content.	Content Management Suite
<b>Inbound Refinery</b>		Manages inbound file conversions for content.	Content Management Suite

<b>Internet Directory</b>	OID	LDAP-compliant directory service including Single Sign On, Certificate Authority and Directory Integration Platform.	Identity Management Suite
<b>JDeveloper</b>	JDEV	Java-based software development suite with sophisticated toolsets.	SOA Suite
<b>Master Data Management</b>	MDM	Consolidates and cleans corporate master data, synchronizes it with all applications, business processes, and analytical tools.	
<b>Portal</b>		Framework for developing, deploying and managing enterprise portals.	
<b>Real-Time Collaboration</b>		Presence and Instance Messaging, Web Conferencing, Voice Communication.	Collaboration Suite
<b>Records Manager</b>		Manages content on a retention schedule.	Content Management Suite
<b>Sensor Edge Server</b>		Captures, filters and manages events from physical sensors such as RFID.	EDA Suite
<b>Service Delivery Platform</b>		Residential VoIP, virtual PBX and Oracle Communication and Mobility Server.	
<b>Service Registry</b>	OSR	Secure UDDI registry for publishing, categorizing and discovering web services.	SOA Suite
<b>SharePoint and Verity Content Integration</b>		Provides seamless integration with 3 <sup>rd</sup> -party products.	Content Management Suite
<b>Site Studio and Publishing Utility</b>		Robust web-site designer with built-in methodology.	Content Management Suite
<b>TopLink</b>		Advanced Java persistence architecture for RDBMS's.	
<b>Unified Messaging</b>		Unified Inbox for all messages via browser for multi-platforms and mobile users.	Collaboration Suite
<b>Virtual Directory</b>		Deploys secure directory-enabled applications using a virtual view.	Identity and Access Management Suite, Single-Sign On Suite
<b>Warehouse Builder</b>	OWB	Oracle Warehouse Builder is Oracle's comprehensive tool for ETL modeling, data quality, data auditing, and full life cycle management of data and metadata.	Business Intelligence

<b>Web Services Manager</b>	OWSM	Provider of security and management capabilities for Service-Oriented Architectures.	SOA Suite, Single-Sign On Suite
<b>WebCenter</b>		A development framework that adds Web 2.0 functionality. Content-rich, AJAX, meta-data management, Wiki's, and Java Server Faces, Presence, RSS, Instant Messaging, and Portlets.	
<b>Workspaces</b>		Groupware to manage team activities, coordinate participation and organize/share information.	Collaboration Suite
